

## CURRICULUM VITAE

Name & Title: Upyong Hong, Professor (1995~Present)  
Affiliation: Dept. of Media and Communication, & Dept. of Human Information and Communication  
Technology, Konkuk University, Seoul Korea  
Email: uphong@konkuk.ac.kr  
URL: <http://www.lclab.net>

### Education

---

1993 PhD. University of Duesseldorf, Linguistics (Psycholinguistics), Germany  
1987 MA. Seoul National University, German Linguistics (Syntax), Korea  
1984 BA. Seoul National University, German Language and Literature, Korea

### Experience

---

2012~2016: President of the Korean Society for Psycholinguistics  
2012~2014: Director of the Institute for General Education, Konkuk University  
2002~2003: Visiting Scholar at University of Essex, England

### Recent Grants & Awards

---

National Research Foundation Grant (2013-2015). "Predictive language processing at sentence and discourse level" (KW 200,000,000).  
National Research Foundation Grant (2012~2013). The neurocognition of syntactic and semantic processing in a second language: An ERP study on Korean learners' comprehension of German sentences (KW 16,500,000)  
Korea Research Foundation Grant (2010-2012). "Chinese learners' utterance structure of Korean: A functional approach" (KW 50,000,000).  
Korea Research Foundation Grant (2007-2009). "Controlled language for technical communication" (KW 300,000,000).

### Recent Journal Publications

---

1. Y. Nam & U. Hong (2016), Local and global semantic integration in an argument structure: ERP evidence from Korean. *Brain Research* 1642, 590-602.
2. Y. Nam, U. Hong, & H. Yun (2016) Toward a unified account of the length effects in sentence production and comprehension. *Linguistic Research* 33(1), 135-175.
3. Yun, H, Nam, Y, Hong, U. & Yoo, D. (2015), The effect of role shifting and expectation in the processing of center-embedded relative clauses in Korean. *Linguistic Research* 32(2), 313-353.
4. Jeong, H., Yun, H. & Hong, U. (2015), The representation and processing of polysemy and homonym in Korean sentence comprehension: An ERP study, *Language and Linguistics* 68, 149-182. (in Kor.)
5. Lee, D. & Hong, U. (2015), Representation and processing of regular and irregular verbs in English as a second language: A masked priming study. *The Journal of Humanities for Unification* 62, 277-307. (in Kor.)
6. Nam, Y. & Hong, U. (2015), Chinese late L2 learners' semantic processing in Korean: An ERP study on the local/global semantic integration during sentence comprehension. *The Korean Journal of Cognitive and Biological Psychology* 27, 183-200. (in Kor.)
7. Yun, H. & Hong, U. (2014), The effect of role predictability and word predictability on sentence comprehension. *Journal of Cognitive Science* 15, 349-390.
8. Jeong, H., Nam, Y. & Hong, U. (2014), Semantic integration between an attributive adjective and a noun in Korean sentence processing, *Linguistic Research* 31(2), 381-402. (in Kor.)
9. Nam, Y. & Hong, U. (2014), Towards a corpus-based approach to Korean as a second language. *The Journal of Humanities for Unification* 57, 193-220. (in Kor.)
10. Hong, U. & Nam, Y. (2014), A functional approach to second language acquisition. *German language and literature* 63, 43-64. (in Kor.)
11. Nam, Y. & Hong, U. (2013), The neurocognition of L2 morpho-syntactic processing: An ERP study on Korean learners' processing of subject-verb agreement in German. *German Linguistics* 28, 41-68. (in Kor.)
12. Nam, Y. & Hong, U. (2013), The effect of constituent length on the word order in language production. *Cognitive Science* 24(1), 25-47. (in Kor.)
